

Errata Sheet  
for Susan Guagliumi's  
**Hand-Manipulated Stitches**  
shared by Beverly Kanvik

The book Hand-Manipulated Stitches by Susan Guagliumi is one of the best volumes of its kind. Although it was out of print for awhile, it is now available again and is being discovered all over again. Several years ago, a group of us worked our way through the book, making each sample. Beverly Kanvik was our leader and, as such, compiled a list of publication mistakes. She shared that list with all the members of the group. This is that original list:

Page 73: The first 10 rows of the chart are wrong. It should show every other stitch reformed and tucked.

Page 104: The chart is in reverse of what is shown in the picture.

Page 119: I found it impossible to latch off the 4th example at the bottom as described. I had to take a separate strand of yarn for the latching.

Page 150: The punchcard pattern at the far left is wrong. The pattern must alternate like the pattern chart shown for the electronic machine. Also, there is an extra dot on the first row of the PC chart.

Page 165: The chart is backward. If you follow the directions, your swatch turns out backward of the picture.

Page 168: Bottom picture explanation described a 3-stitch cord when the picture shows a 4-stitch cord.

Page 170: The top chart has errors. First the cable shown is not the cable in the picture. Second the cross that is shown on Row 11 should be on Row 12 and the one shown on Row 19 should be on Row 20, according to the directions.

Page 181: The chart is in reverse of what is shown in the picture.

Page 186: In A at the bottom, the cable turns the wrong way.

Page 204: The chart for the cables is wrong. The cables should be turned toward one another toward the center. Chart shows them both turned in the same direction.

Page 205: The picture shows 7 stitches being crossed, but the chart only shows 6 stitches being crossed. Also, the directions for this swatch are different on the video.

Page 208: In the XOX example, the first 2 crossings should be towards one another, not away from. At the bottom, the chart shows 3 stitches between each example, but the picture shows only 2.

Page 210: The charts are in reverse of what is shown in the pictures.

Page 212: On the lefthand side of the Basketweave chart, the outside crosses should go toward the outside on the bottom half and toward the center on the top half.

Page 220: The chart is in reverse of the picture.
