

# Calculating the Amount of Yarn Needed

Yarn: \_\_\_\_\_ Machine: \_\_\_\_\_ Tension: \_\_\_\_\_ Date: \_\_\_\_\_

Gauge: \_\_\_\_\_ stitches X \_\_\_\_\_ rows per \_\_\_\_\_ inch(s)

## Measure your total swatch to find the square inches:

Width in inches \_\_\_\_\_ X Height in inches = \_\_\_\_\_ = square inches of swatch \_\_\_\_\_

(e.g. 11" x 9" = 99 square inches)

## Weigh the Swatch:

Weight of the Swatch in grams = \_\_\_\_\_

(e.g. 42 grams)

## Determine Weight Per Square Inch: (e.g. 42 ÷ 99 = .42 grams per square inch)

Weight of the swatch \_\_\_\_\_ ÷ \_\_\_\_\_ square inches of swatch = \_\_\_\_\_ grams per square inch

## Determine Square Inches of Pattern Pieces:

Back: 20"w x 23"h = 460  
 Front: 20"w x 23"h = 460  
 LSleeve: 12"w x 23"h = 276  
 RSleeve: 12"w x 23"h = 276  
 Total = 1472 square inches

Back \_\_\_\_\_" w x \_\_\_\_\_" h = \_\_\_\_\_

Front \_\_\_\_\_" w x \_\_\_\_\_" h = \_\_\_\_\_

L Sleeve \_\_\_\_\_" w x \_\_\_\_\_" h = \_\_\_\_\_

R Sleeve \_\_\_\_\_" w x \_\_\_\_\_" h = \_\_\_\_\_

Total Pattern Square Inches = \_\_\_\_\_

## Determine Total Grams Needed: (e.g. 1472 x .42 = 618.24 grams)

Pattern square inches \_\_\_\_\_ X Grams per square inch \_\_\_\_\_ = \_\_\_\_\_ Total Grams needed

Total grams needed \_\_\_\_\_ X 0.035 = \_\_\_\_\_ total ounces needed

50 gram ball (need 12 – 13 balls)

100 gram ball (need 7 balls)

1 pound cone = 450 grams (need 1.5lbs)
