

# MMKC University

## Sophomore Program

---

The Sophomore Program at MMKC University offers a two-day class with the novice machine knitter in mind. The goal of this program is to develop skills of the machine knitter resulting in finished items. This program pre-requisite is attendance of the Freshman Program or basic understanding of techniques offered in that program. Instructors will not teach basic techniques from the Freshman Program in these classes. Main-bed Japanese knitting machines only (no ribbers please). See supply list for machine and materials required.

MMKC does not sell or repair knitting machines. The MMKC website, <http://www.midwestmachineknitters.org/> has listings of dealers within and outside the state of Minnesota as well as links to other sources for machine knitting.
