Yarn Recommendations:

One of the most challenging aspects of this course is the yarn recommendation list. Based on the gauges of machines and the plethora of yarn available, as long as attendees bring yarn that suits machine gauge and are suitable for the purposes of learning, we can pretty much guarantee success. We've provided a list of yarns currently available but if you have other yarns in your stash and are wondering if they will work, please reach out to us – mmkc.mn@gmail.com.

We do not recommend very fine hard dress yarns or yarns that are fingering weight or lighter. We have watched new knitters struggle with yarns that are too fine, too bulky, or novelty yarns that are difficult. We applaud your desire to use whatever you want but for purposes of learning, please try to meet one of the following types of yarn.

Light colored yarns work best in a learning environment – white, cream, baby blue, baby pink, etc. Bring at least 5-6 ounces each of two colors of yarn.
